Question Word

Strategy

- 1 Does the question use 嗎 or 呢?
 Copy the question leaving off the 嗎 or 呢.
 Add 不 before the verb for negative responses.
- 2 Look for a question word (哪兒, 誰, 什麼, 多少). Copy the question leaving a blank for the question word. This is where you fill in the answer. Even if your answer is wrong you have a grammatically correct response.
- 3 If there is no question word then the question is probably a choice question. Look for verb 不 verb or 有沒有. Copy the question selecting either the verb alone for affirmative responses, or 不 verb / 沒有 to reply in the negative.

This answer conforms to the replace the question word with the answer strategy, but a better way to answer a 作什麼工作 question is just to reply something like:
 她是大夫。
